Curriculum vitae

Stojanche Krstevski

Senior software engineer

I model complex business domains, then build and run the software.

Profile

Senior full-stack software engineer, building production enterprise applications since 2022. I own features end to end, from requirements and design to implementation, testing and release. Strong in Kotlin and Java with Spring Boot, TypeScript with Angular, React and Vue, and PostgreSQL, with a focus on clean architecture, performance and code quality. I also build and run four products of my own, used by trainers, merchants and restaurants.

Experience

Senior software engineer

May 2025 – present

G+D Netcetera Skopje, North Macedonia

- Develop key modules of P40, a large-scale enterprise system.
- Own features end to end: requirements, design, implementation, testing, code review and release support.
- Build and maintain backend services and APIs with a strong focus on clean code and correctness.
- Built an internal migration tool that reduced manual work.
- Led and mentored three interns through a three-month program: task breakdown and code reviews.

Software engineer

Feb 2022 – May 2025

Sorsix Skopje, North Macedonia

- Delivered scalable platform modules for a medical software system.
- Built Gatling performance tests that found bottlenecks and improved throughput.
- Ran penetration tests and security assessments.
- Worked directly with clients and stakeholders to refine requirements and deliver solutions.
- Mentored and led three interns, planning their tasks and reviewing their pull requests.

Skills

Backend
Java, Kotlin, Spring Boot, PostgreSQL, RabbitMQ

Web
TypeScript, Angular, React, Vue, Tailwind CSS

Mobile
Ionic, Capacitor

Testing
Kotest, Gatling

Infrastructure
Docker, Hetzner, AWS, Kubernetes

Practices
Domain-driven design, event storming, BPMN process modeling, multi-tenant SaaS, event-driven systems

Ways of working
End-to-end ownership, system design, team leadership and mentoring, time management

Senior software engineer

Products I build and run

Four products of my own, live with real users. On each one I do the product, design, engineering and operations.

Fitora

Since 2025

Coaching platform for fitness trainers: web for trainers, iOS and Android for their clients.

10 trainers, 140 clients, 99.99% uptime

What I did: Product and UX, UI design, backend, web app for trainers, iOS and Android apps, hosting, monitoring, on-call

fitora.mk Case study

Shopy

Since 2023

SaaS e-commerce platform: every merchant gets a branded store on their own domain.

4 live stores, 99.99% uptime

What I did: Product and UX, storefront themes, merchant admin, backend and checkout, payment provider integration, hosting, monitoring, on-call

Live stores: zlataraani.mk, donandon.mk, 389fightgear.mk, demetrashop.com

Case study

Digital Menu

Since 2022

NFC menus: guests tap their phone on the table and the menu opens in the browser.

40 restaurants, 99.99% uptime

What I did: Product and UX, guest menu design, staff tools, NFC tag setup, backend, hosting, monitoring, on-call

demo.tapnmenu.mk (demo) Case study

Boop

Since 2026

Voice-first personal assistant for iPhone: tasks, lists, reminders at a time or a place.

Internal tool

What I did: Product and UX, voice conversation design, iPhone app, time and place reminders, offline notifications, testing on real streets

Case study

Education

Bachelor in Computer Science

Oct 2019 – Oct 2023

Faculty of Computer Science and Engineering, Ss. Cyril and Methodius University, Skopje

Software engineering fundamentals, algorithms and data structures, databases and web development. Projects in Java, Kotlin and TypeScript.
